

# LINERIO SLAT PANELS

# LINERIO PANELS. WALL WITH DEPTH

Linerio slat panels give the interior a unique character. They can play the role of the main decoration, the quiet hero in the background or help to designate different zones in the interior.

Linerio panels are available in three widths and several colors, thanks to which we gain a lot of freedom of arrangement.

# KEY FEATURES

## EASY INSTALLATION

The installation is quick and easy. Panels are installed with adhesive and can be easily cut to the desired size using a saw or jigsaw.

## EASY TO KEEP CLEAN

Can be cleaned easily with a damp cloth and mild detergent.

## IMPROVE SOUNDPROOFING

Thanks to the material they are made of and their spatial structure, the panels soundproof the interior and eliminate reverberation and echo in large rooms

## WATERPROOF

Panels can be installed as well in interiors with increased humidity, on condition they don't have direct contact with water.

## LOW WEIGHT

Linerio panels are made of polystyrene. This makes them light, which means that the transport and mounting of the product are very easy.

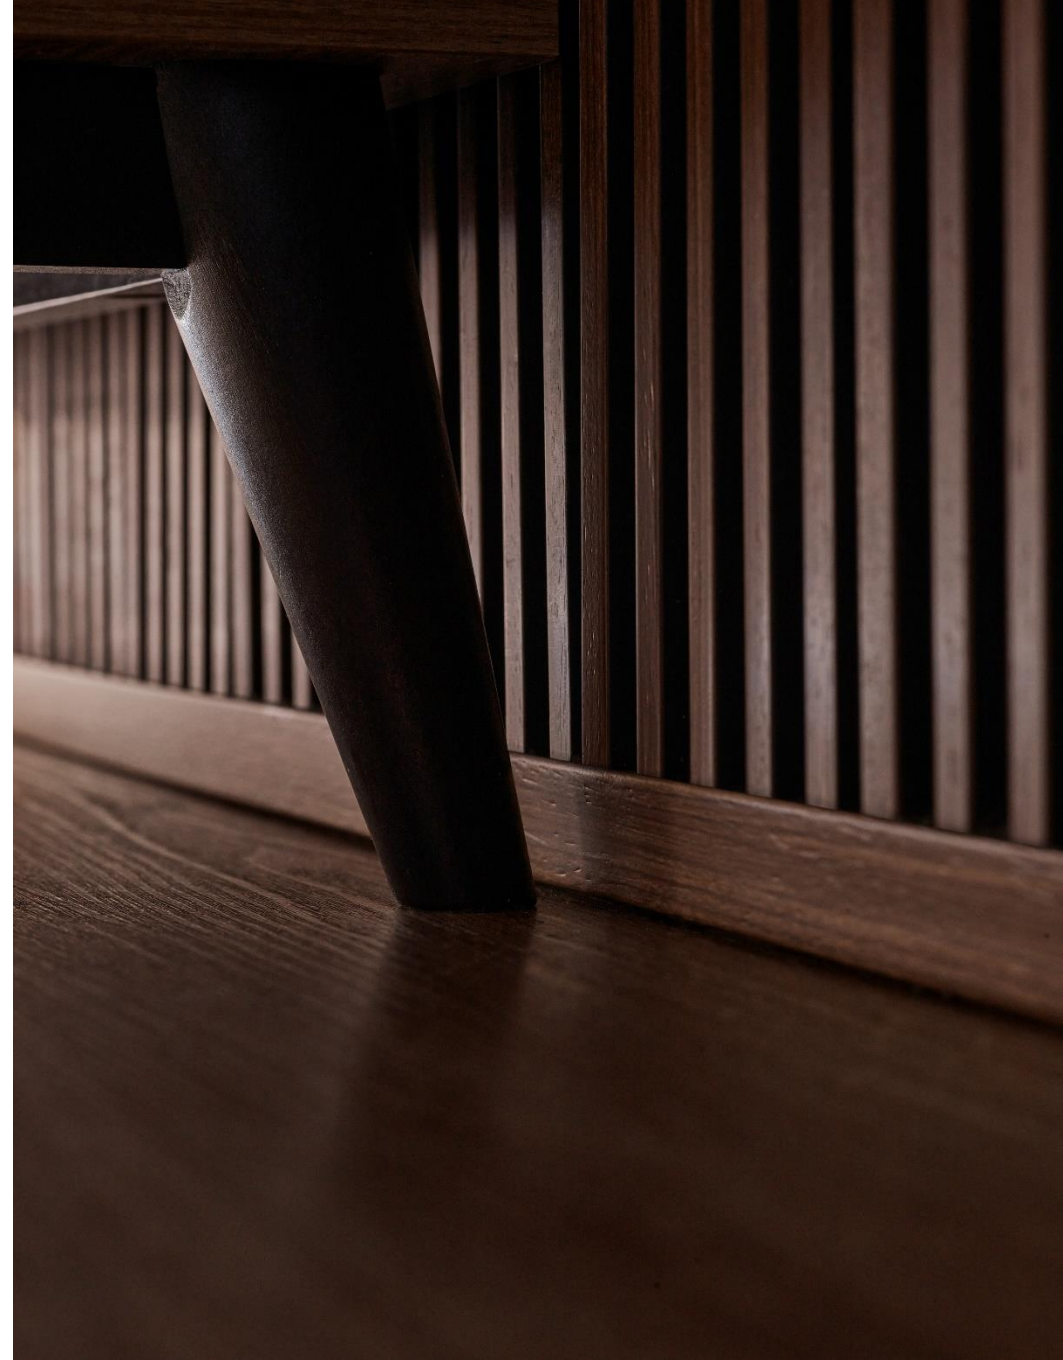

## RECYCLABLE

Linerio panels are made of fully recyclable material.

# PRACTICAL MATERIAL

Linerio panels owe their unique properties to the material from which they are made. To manufacture the panels, we use polystyrene covered with a print made by hot-stamping. Polystyrene is a modern material that is 100% recyclable. It is lightweight, durable, and easy to clean. This means that Linerio can be installed even in more demanding areas, such as the hallway, work area, or the kitchen.

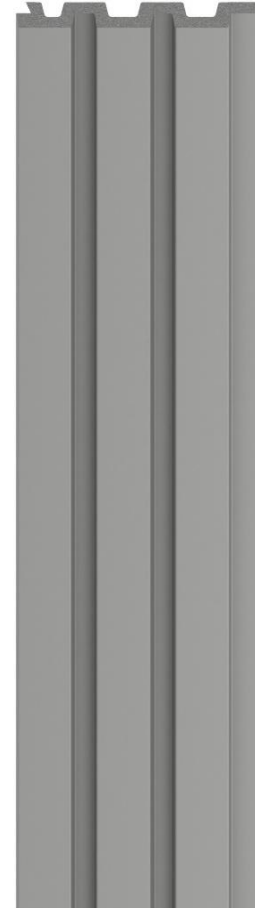

# AVAILABLE SHAPES

Linerio panels are available in several lines XS, S, M, M Plus and L, which differ in the width and depth of the slats.

# TECHNICAL DETAILS

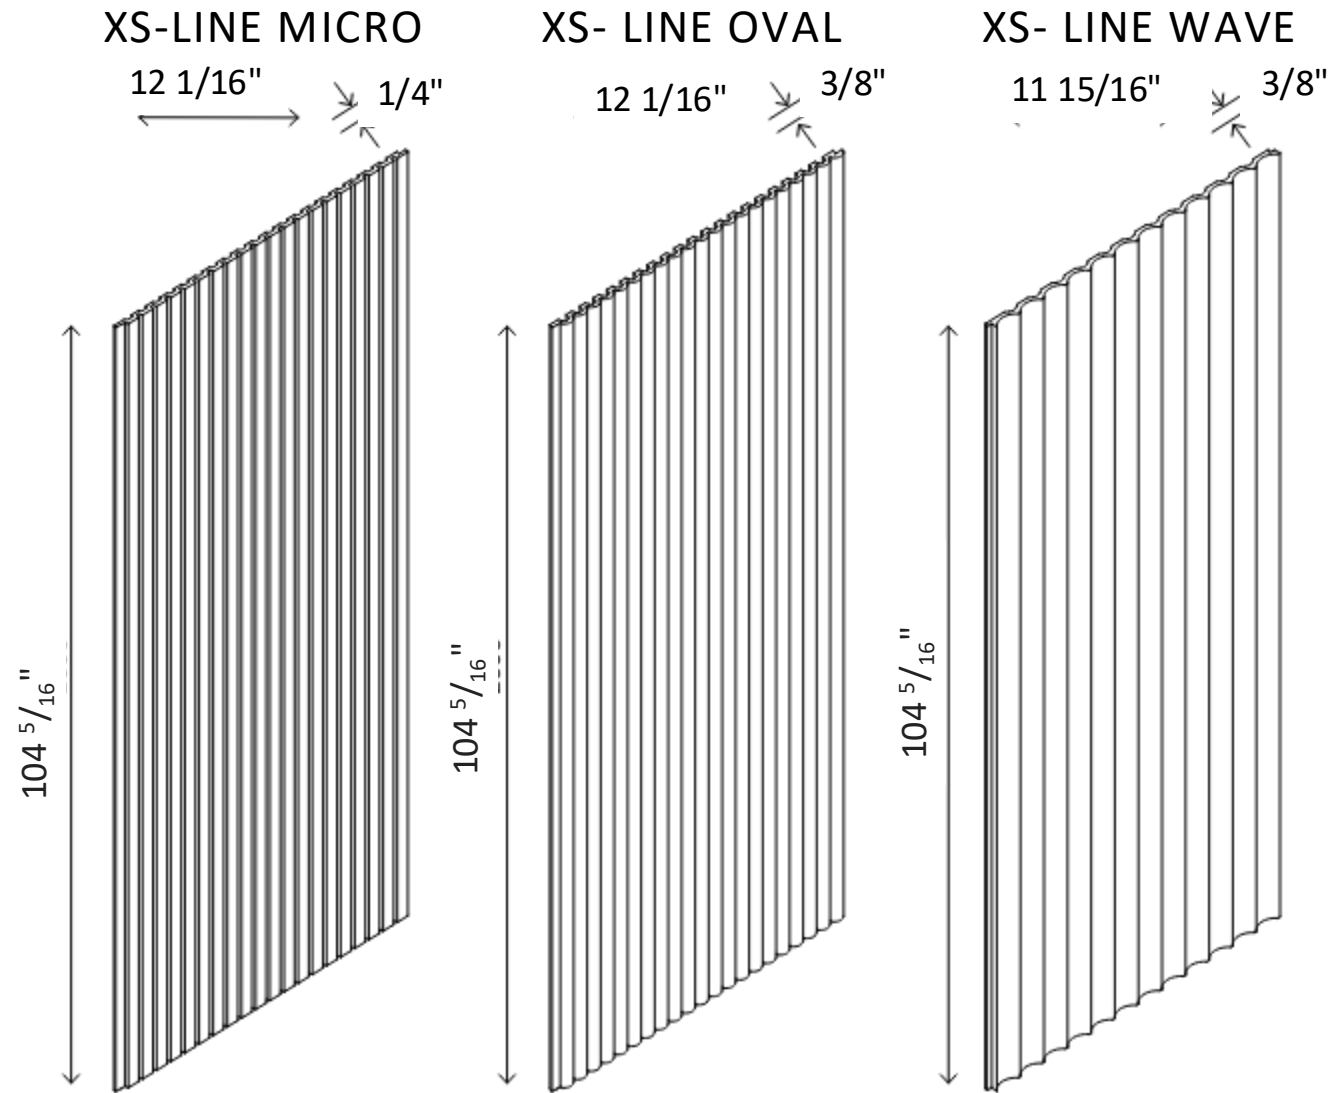

— Panel length  $104 \frac{5}{16}$ "

\* The product may be longer than the declared dimension by approximately  $\frac{13}{16}$ " inches.

# TECHNICAL DETAILS

— Panel length  $104 \frac{5}{16}"$

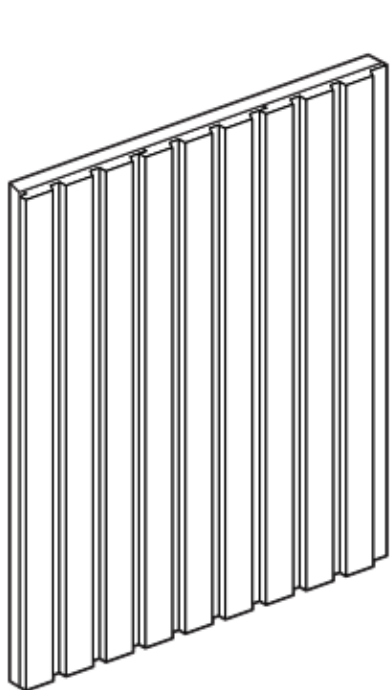

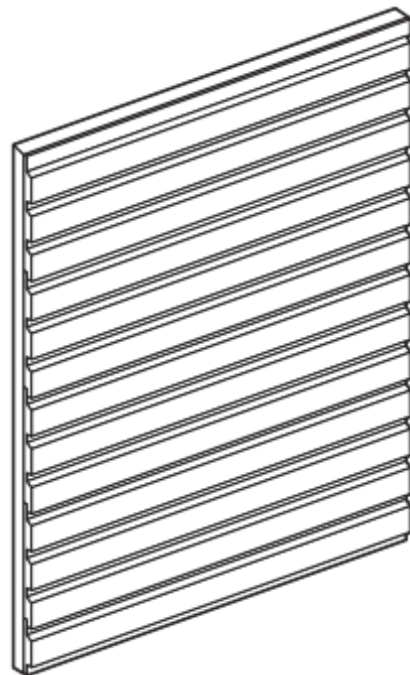

# INSTALLATION ADVANTAGES

- Quick installation – easy cut using a saw or jigsaw
- Choice of mounting options - vertically, horizontally, diagonally.
- Does not require additional substrate preparation work (e.g. priming) as well as protecting the top layer (e.g. grouting)
- Clean installation, no dust
- Immediate 3D effect on the wall after installation - the rooms can be used immediately

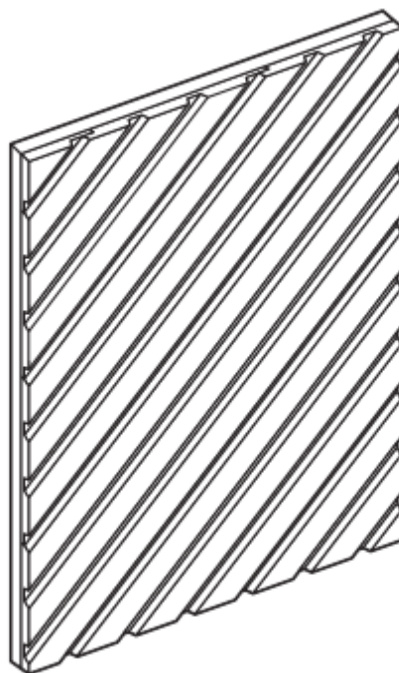

# INSTALLATION OPTIONS

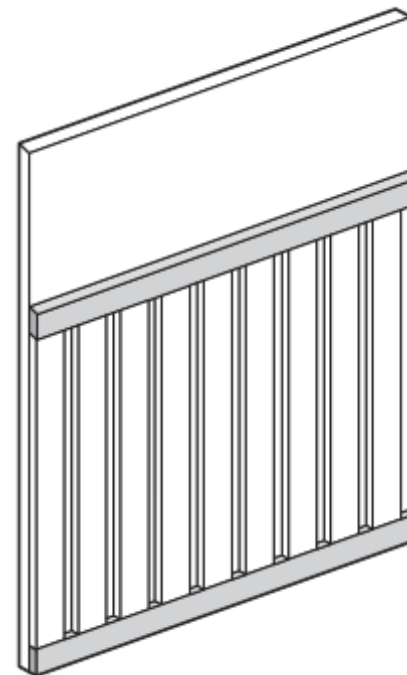

Vertically

Horizontally

Diagonally

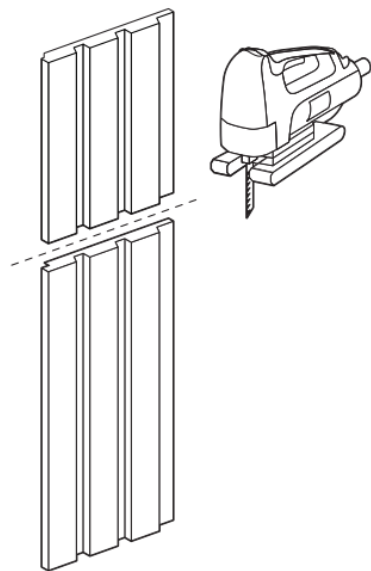

Paneling (bottom part  
of the wall)

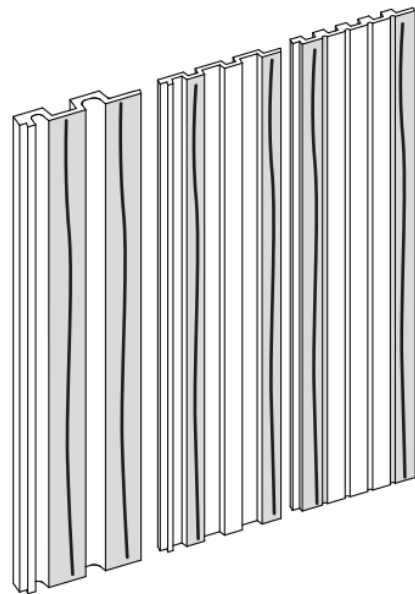

# INSTALLATION

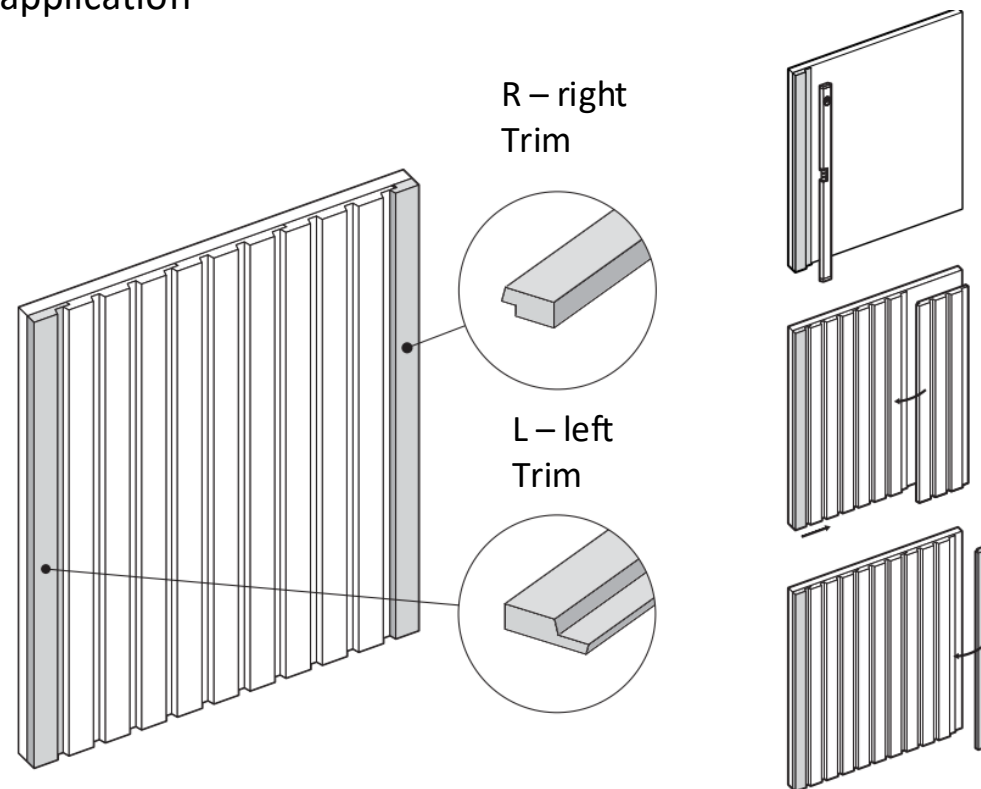

## 1. Cutting

## 2. Glue application

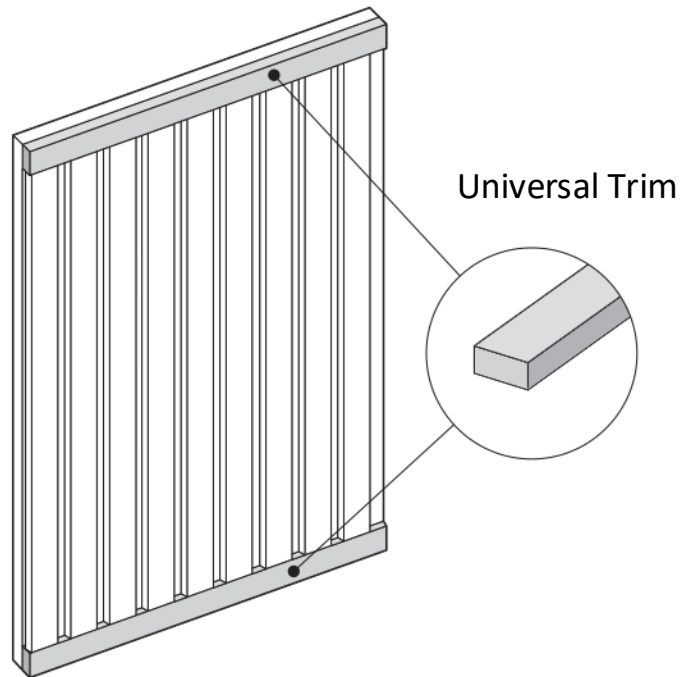

## 3. Trims application

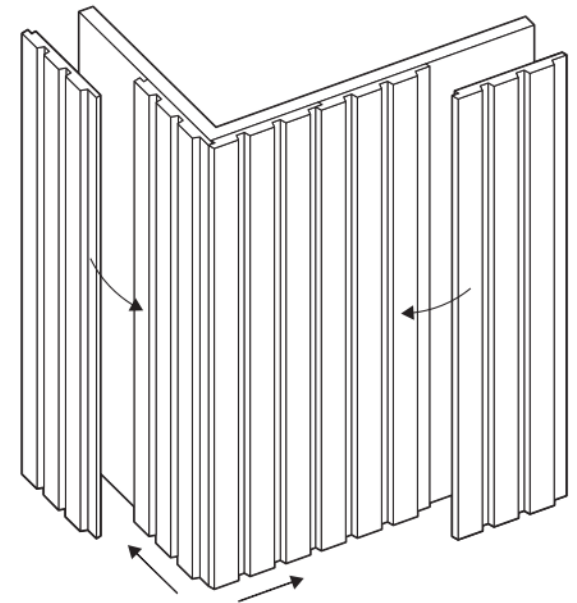

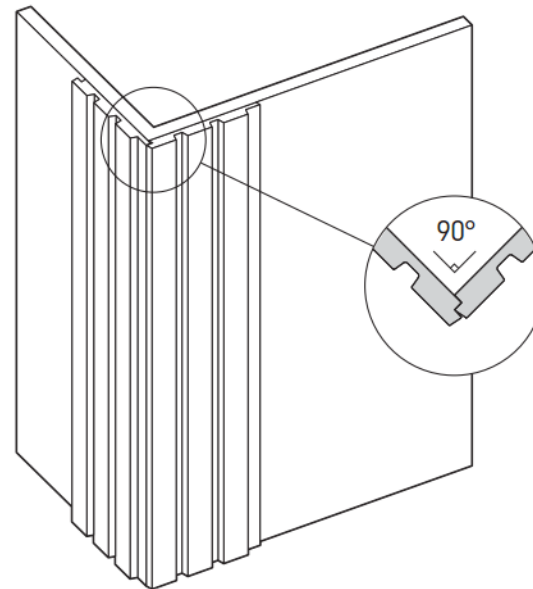

# INSTALLATION

## 4. Use of universal Trims.

## 5. External corner
