Long and short side joint

Technology

Wall panels are manufactured using SPC (Stone Polymer Composite) technology, and their tongue-and-groove joint system makes them:

- Waterproof and suitable for use in high-humidity areas such as bathrooms and kitchens;
- Grout-free, creating a subtle joint effect –making them an attractive alternative to tiles;
- Simple and intuitive to install, allowing you to enjoy the results immediately after completion;

Precise grout-free jointing

SPC wall panels connect using a tongue-and-groove system, creating a stable and aesthetic joint without visible gaps. Thanks to their precise fit, they require no grouting, which simplifies installation and ensures an elegant look.

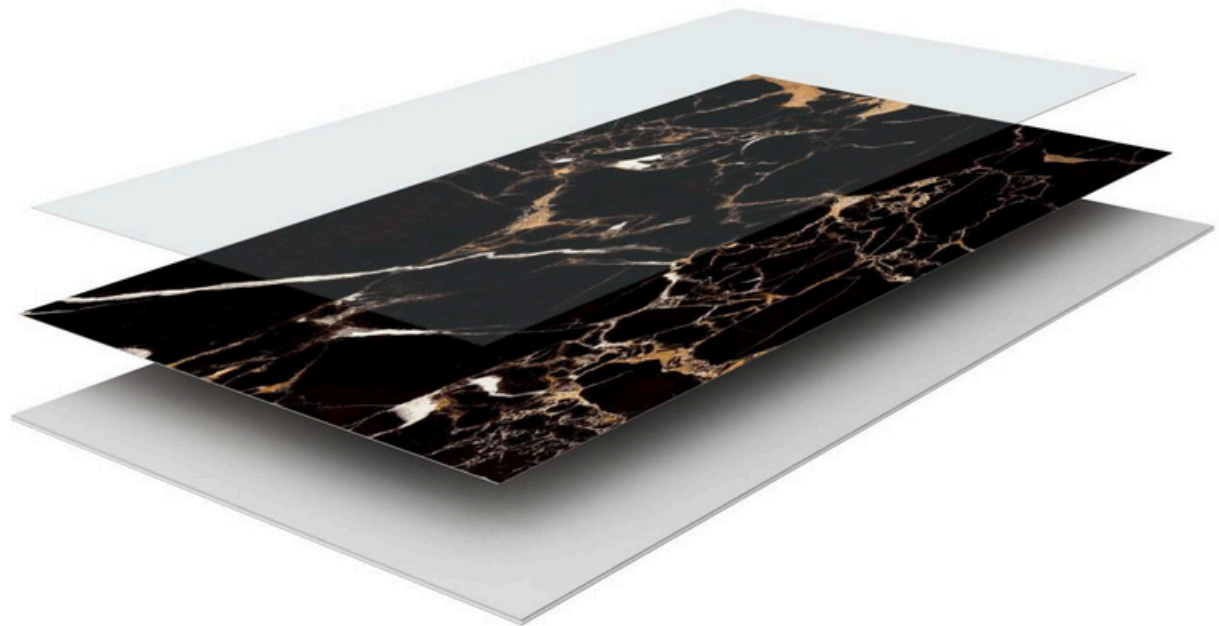

High resistance

A series of tests in both in-house and external laboratories showed that SPC wall panels feature high impact resistance. The panel does not deform, and its solid outer layer remains intact. High-quality material makes the panel stain-resistant, ranging from substances like coffee or tea to solutions of ethyl alcohol, acetic acid, or sodium bicarbonate. Gentle cleaning agents are recommended for panel care.

Panel structure

- ProtectiveUV lacquer
- Decorative layer
- SPC compositecore

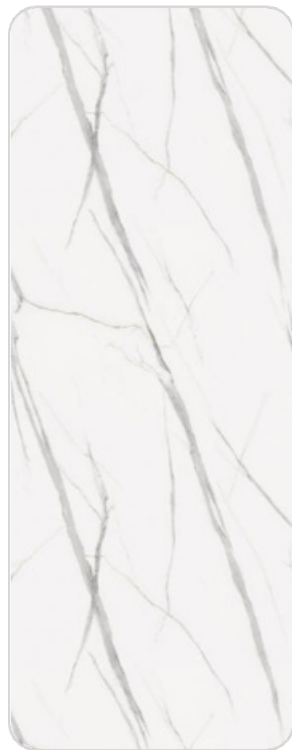

WhySPC wall panels?

- Simple to install;
- Easy to transport;
- Waterproof product;
- Installation using glue and basic tools;
- No grouting required;
- Good price;
- High quality;
- Quick interior makeover;

Installation

Installation of SPC wall panels is simple and intuitive, so room changes bring immediate functional and visual results.

For installation you will need:

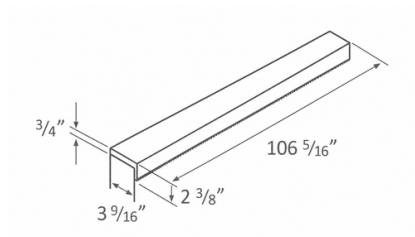

Installation

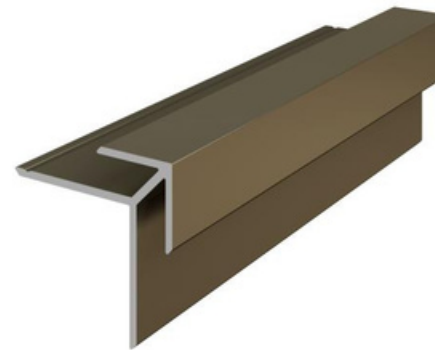

* Detailed installation instructions are available at vilohome.com and inside the packaging.

Accessories

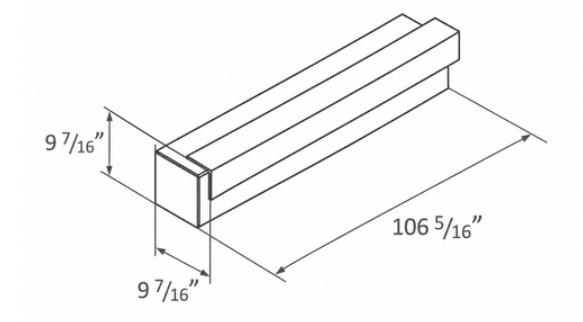

PC wall panels are complemented by A-05 finishing trims and A-07 external corner trims, designed for an aesthetic and elegant wall finish. To ensure a perfect match for any arrangement, the trims are available in three classic color options: silver, champagne, and black. The length of the trims is $106 \frac{5}{16}$ ".

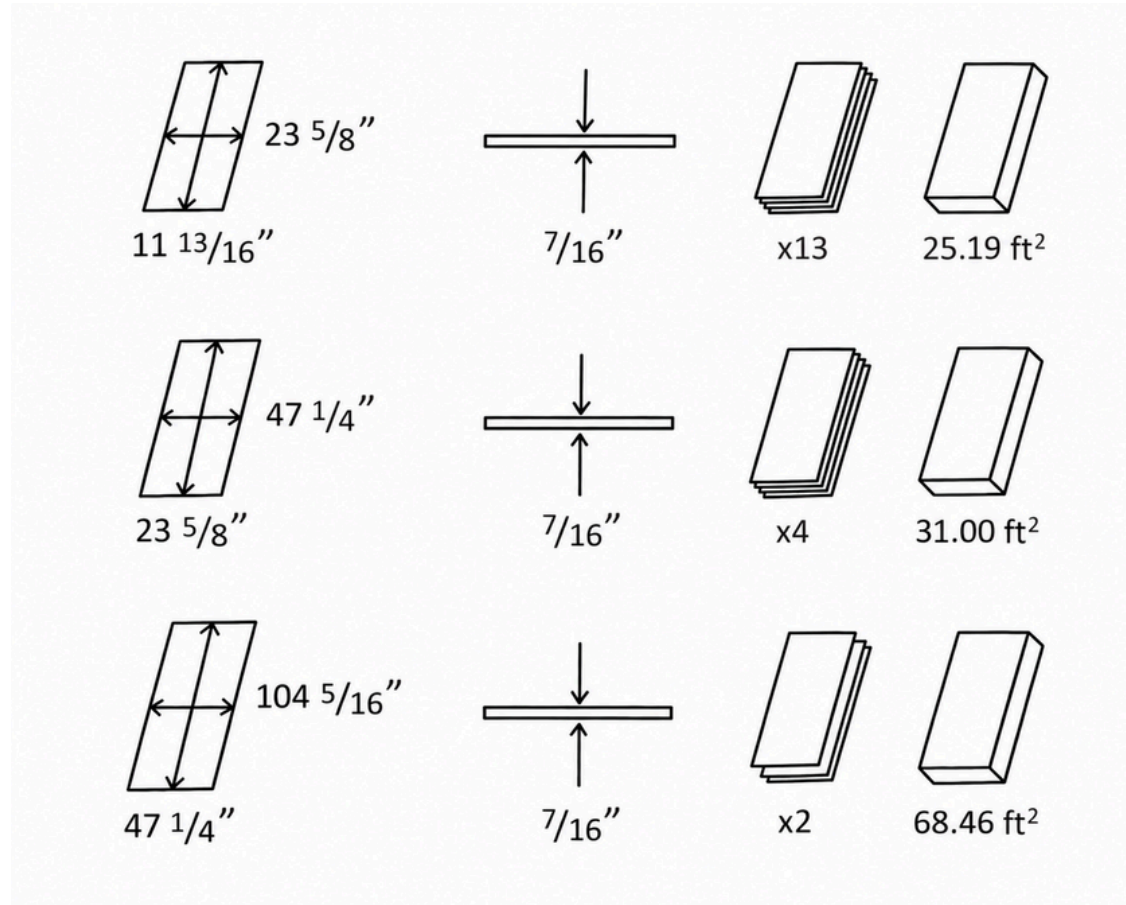

Finishing trim A-05

External corner A-07

Technical information

SPC wall panels vs. tiles

Easy to install:

- no need for specialized and expensive tools;
- the installation of SPC wall panels is clean –the panels do not generate as much dust as a tile when cut;
- no need to grout the panels or use the so-called crosses;
- the adhesive used to install the SPC wall panels dries quickly; the interior will be ready for use faster;

Hygienic:

- SPC wall panels do not require grouting, which helps avoid areas that can potentially be exposed to mould and fungi.

SPC wall panels vs. tiles

Easy to work with:

- SPC wall panels can be cut with a knife, obtaining various dimensions and shapes;
- the panels can be adjusted to the difficult points in the room faster and easier;
- the product is light –easy to transport;

Thickness:

- SPC wall panels are $\frac{3}{16}$ " thick -taking up less space than tiles,
